Summary

Frontend Developer candidate with hands-on experience in React, Next.js, TypeScript, JavaScript, HTML/CSS, Git, and live deployed web projects. Electronics and Communication Engineering undergraduate with a project-driven foundation in responsive UI development, interactive web applications, API integration, and software development, supported by experience in Java, Python, and Verilog.

Education

Presidency University Bengaluru, Karnataka
Bachelor of Engineering – Electronics and Communication Engineering *2023 – 27*

- 4th Year, 7th Semester
- Cumulative CGPA: 8.31 / 10.0

St. Joseph PU College Kodagu, Karnataka
Pre-University Course *2021 – 2023*

- Aggregate: 80.6%

Experience

JPMorgan Chase & Co. — Software Engineering Job Simulation (Forage)
Virtual Experience Program

- Built a Spring Boot service that consumed transaction events from Apache Kafka and persisted them to an H2 in-memory database via Spring Data JPA, validating each transaction and updating user balances. Designed and integrated a REST API with a controller that exposed a balance-lookup endpoint, calling an external incentive service via RestTemplate and returning structured JSON responses to clients.

Projects

CoffeeScope — React/Next.js Frontend Application Live demo

- Built a responsive, interactive agricultural marketplace/dashboard using React, Next.js, TypeScript, Tailwind CSS, and Supabase, with reusable UI components, authentication, forms, dashboards, and API/database integration.
- Implemented interactive market analytics, farm dashboards, alerts, search/filtering, responsive navigation, and real-time backend-driven data flows
- Tech Stack: Next.js, React, TypeScript, Tailwind CSS, Recharts, Leaflet

Logic Gate Simulator Live demo

- Developed an interactive React + JavaScript/TypeScript logic-gate simulator with reusable components for gates, inputs, outputs, and circuit connections, enabling users to build and test digital circuits directly in the browser.
- Implemented dynamic DOM/UI updates, gate-state propagation, truth-table behavior, circuit interaction, and responsive layouts
- Tech Stack: HTML, CSS, JavaScript

Achievements

- Scaler Topics — Certificate of Excellence, Python Course for Beginners: Mastering the Essentials.
- DataCamp — Working with the OpenAI API
- DataCamp — Prompt Engineering with the OpenAI API

Skills

- **Programming:** Python, Java, JavaScript, TypeScript, C, C++.
- **AI / ML:** Deep Learning (CNN, LSTM), Neural Networks, TensorFlow, PyTorch, LLM Agents (MCP, Ollama).
- **Data Processing:** NumPy, Pandas, Matplotlib, SciPy, Recharts (data visualization).
- **Web:** HTML5, CSS3, React, Next.js, Tailwind CSS, Node.js, REST APIs, DOM and browser APIs, Figma-to-UI implementation, Frontend performance, accessibility, and cross-browser compatibility.
- **Tools:** Git, GitHub, MATLAB, MySQL, Vercel, Netlify.
- **Soft Skills:** Problem-Solving, Communication, Teamwork, Time Management, Quick Learner.
